Email	mariana@elastotec.com.au						

SECTION 1: PRODUCT IDENTIFICATION

Product name: Elastotec Direct Bond Ceramic Filler Part B – Rapid Cure **Recommended use:** Adhesive for protection of equipments in mines, coal fired plants

Supplier: Elastotec P/L

SECTION 2: HAZARDS IDENTIFICATION

This material is hazardous according to health criteria of Safe Work Australia GHS 7.

Signal Word Danger

Hazard Acute Toxicity - Oral - Category 3
Classifications Acute Toxicity - Dermal - Category 3
Skin Corrosion/Irritation - Category 1B

Serious Eye Damage/Irritation - Category 1

Sensitisation - Skin - Category 1

Chronic Hazard to the Aquatic Environment - Category 3

Hazard Statements

H301	Toxic if swallowed.
H311	Toxic in contact with skin.
H314	Causes severe skin burns and eye damage.
H317	May cause an allergic skin reaction.
H318	Causes serious eye damage.
H412	Harmful to aquatic life with long lasting effects.

Prevention Precautionary Statements

P261 Avoid breathing dust, fume, gas, mist, vapours or spray.

P264 Wash hands, face and all exposed skin thoroughly after handling.

P270 Do not eat, drink or smoke when using this product.

ELASTOTEC DIRECT BOND CERAMIC FILLER PART B – RAPID CURE MATERIAL SAFETY DATA SHEET

P272 Contaminated work clothing should not be allowed out of the workplace.

P273 Avoid release to the environment.

P280 Wear protective clothing, gloves, eye/face protection and suitable respirator.

Response Precautionary Statements

P101 If medical advice is needed, have product container or label at hand.

P301+P330+P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

P303+P361+P353 IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin

with water/shower.

P304+P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for

breathing.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if

present and easy to do. Continue rinsing.

P310 Immediately call a POISON CENTER or doctor/physician

Storage Precautionary Statement

P405 Store locked up.

Disposal Precautionary Statement

P501 Dispose of contents/container in accordance with local, regional, national and

Poison Schedule

S5. Caution

Dangerous Good Classification

Classified as Dangerous Goods by the criteria of the "Australian Code for the Transport of Dangerous Goods by Road & Rail" and the "New Zealand NZS5433: Transport of Dangerous Goods on Land".

Dangerous Goods Class

8

Subrisk 1:

6.1

SECTION 3:	COMPOSITION INFORMATION		
CHEMICAL ENTITY		CAS NO	PROPORTION
1,2-Ethanediamine, N,N'-bis(2-aminoethyl)-		112-24-3	30-60 %
Cresylic acid		1319-77-3	30-60 %
Ingredients determined	to be Non-Hazardous		Balance
		- -	100%

SECTION 4: FIRST AID MEASURES

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone Australia 131 126, New Zealand 0800 764 766).

Inhalation: Remove victim from exposure - avoid becoming a casualty. Remove contaminated clothing

and loosen remaining clothing. Allow patient to assume most comfortable position and keep warm. Keep at rest until fully recovered. Seek medical advice if effects persist.

Skin Contact: Effects may be delayed. This material, or a component of the material, can be absorbed

through the skin with resultant toxic effects. If skin or hair contact occurs, immediately remove contaminated clothing and flush skin and hair with running water. Continue flushing with water until advised to stop by the Poisons Information Centre or a Doctor; or for 15 minutes and transport to Doctor or Hospital. For gross contamination, immediately drench

ELASTOTEC DIRECT BOND CERAMIC FILLER PART B - RAPID CURE MATERIAL SAFETY DATA SHEET

with water and remove clothing. Continue to flush skin and hair with plenty of water (and soap if material is insoluble). For skin burns, cover with a clean, dry dressing until medical help is available. If blistering occurs, do NOT break blisters. If swelling, redness, blistering,

or irritation occurs seek medical assistance.

Eve contact: Immediately irrigate with copious quantities of water for 15 minutes. Eyelids to be held

open. Remove clothing if contaminated and wash skin. Urgently seek medical assistance.

Transport to hospital or medical centre.

Immediately rinse mouth with water. If swallowed, do NOT induce vomiting. Give a glass of Ingestion:

water to drink. Never give anything by the mouth to an unconscious patient. If vomiting occurs give further water. Immediately call Poisons Centre or Doctor. Transport to a doctor

or hospital quickly.

PPE for First Aiders: Wear safety shoes, gloves, safety glasses. Available information suggests that gloves

> made from nitrile rubber should be suitable for intermittent contact. However, due to variations in glove construction and local conditions, the user should make a final assessment. Always wash hands before smoking, eating, drinking or using the toilet. Wash

contaminated clothing and other protective equipment before storing or re-using.

Notes to physician: Treat symptomatically. Effects may be delayed. Can cause corneal burns.

SECTION 5: FIRE FIGHTING MEASURES

Hazchem Code: 2X

Suitable

If material is involved in a fire use water fog (or if unavailable fine water spray), alcohol extinguishing media:

resistant foam, standard foam, dry agent (carbon dioxide, dry chemical powder).

Specific hazards: Non-combustible material.

Fire fighting further

advice:

Not applicable.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Small spill: Wear protective equipment to prevent skin and eye contamination. Avoid inhalation of

vapours or dust. Wipe up with absorbent (clean rag or paper towels). Collect and seal in

properly labelled containers or drums for disposal.

Large spills: Clear area of all unprotected personnel. Slippery when spilt. Avoid accidents, clean up

> immediately. Wear protective equipment to prevent skin and eye contamination and the inhalation of vapours. Work up wind or increase ventilation. Contain - prevent run off into drains and waterways. Use absorbent (soil, sand or other inert material). Collect and seal in properly labelled containers or drums for disposal. If contamination of crops, sewers or

waterways has occurred advise local emergency services.

Initial Emergency Response Guide No:37 **Dangerous goods:**

SECTION 7: HANDLING AND STORAGE

Handling: Avoid eye contact and skin contact. Avoid inhalation of vapour, mist or aerosols.

Store in a cool, dry, well-ventilated place and out of direct sunlight. Store away from Storage:

foodstuffs. Store away from incompatible materials described in Section 10. Store away from sources of heat and/or ignition. Store locked up. Keep container standing upright.

Keep containers closed when not in use - check regularly for leaks.

This material is classified as a Class 8 Corrosive, Division 6.1 Toxic Substance as per the criteria of the "Australian Code for the Transport of Dangerous Goods by Road & Rail" and/or the "New Zealand NZS5433: Transport of Dangerous Goods on Land" and must be

stored in accordance with the relevant regulations.

This material is a Scheduled Poison Schedule 5 (Caution) and must be stored, maintained and used in accordance with the relevant regulations.

SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

National occupational exposure limits:

TWA STEL NOTICES

ppm mg/m3 ppm mg/m3

ELASTOTEC DIRECT BOND CERAMIC FILLER PART B - RAPID CURE MATERIAL SAFETY DATA SHEET

Cresol, all isomers 5 22 Sk

TWA - The time-weighted average airborne concentration over an eight-hour working day, for a five-day working week over an entire working life.

STEL (Short Term Exposure Limit) - the average airborne concentration over a 15 minute period which should not be exceeded at any time during a normal eight-hour workday.

'Sk' Notice - absorption through the skin may be a significant source of exposure. The exposure standard is invalidated if such contact should occur.

These Exposure Standards are guides to be used in the control of occupational health hazards. All atmospheric contamination should be kept too as low a level as is workable. These exposure standards should not be used as fine dividing lines between safe and dangerous concentrations of chemicals. They are not a measure of relative toxicity.

If the directions for use on the product label are followed, exposure of individuals using the product should not exceed the above standard. The standard was created for workers who are routinely, potentially exposed during product manufacture.

Biological Limit

As per the "National Model Regulations for the Control of Workplace Hazardous

Values: Substances (Safe Work Australia)" the ingredients in this material do not have a Biological

Limit Allocated.

Engineering Measures:

Ensure ventilation is adequate to maintain air concentrations below Exposure Standards. Use only in well ventilated areas. Use with local exhaust ventilation or while wearing

appropriate respirator. Vapour heavier than air - prevent concentration in hollows or sumps.

Do NOT enter confined spaces where vapour may have collected.

Personal Protection Equipment:

SAFETY SHOES, GLOVES, SAFETY GLASSES.

Personal protective equipment (PPE) must be suitable for the nature of the work and any

hazard associated with the work as identified by the risk assessment conducted.

Wear safety shoes, gloves, safety glasses. Available information suggests that gloves made from nitrile rubber should be suitable for intermittent contact. However, due to variations in glove construction and local conditions, the user should make a final assessment. Always wash hands before smoking, eating, drinking or using the toilet. Wash

contaminated clothing and other protective equipment before storing or re-using.

Keep away from food, drink and animal feeding stuffs. When using do not eat, drink or Hygiene measures:

smoke. Wash hands prior to eating, drinking or smoking. Avoid contact with clothing. Avoid eye contact and skin contact. Avoid inhalation of vapour, mist or aerosols. Ensure that

eyewash stations and safety showers are close to the workstation location.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Form: Liquid Colour: Blue Odour: Phenolic

Solubility: Soluble in water Specific Gravity (20 °C): 0.98-1.02 @ 25 °C

Relative Vapour Density (air=1):

Vapour Pressure (20 °C): <0.01 Pa Flash Point (°C): 149 °C **Boiling Point/Range (°C):** 277 °C **Decomposition Point (°C):** >200 °C Total VOC (g/Litre): Nil % Volatile by Volume:

> (Typical values only - consult specification sheet) N Av = Not available, N App = Not applicable

STABILITY AND REACTIVITY **SECTION 10:**

Chemical stability: This material is thermally stable when stored and used as directed.

Elevated temperatures and sources of ignition. Conditions to avoid:

Incompatible materials:

Oxidising agents.

ELASTOTEC DIRECT BOND CERAMIC FILLER PART B - RAPID CURE MATERIAL SAFETY DATA SHEET

Hazardous decomposition products:

Oxides of carbon and nitrogen, smoke and other toxic fumes.

Hazardous reactions: No known hazardous reactions.

SECTION 11: TOXICOLOGICAL INFORMATION

No adverse health effects expected if the product is handled in accordance with this Safety Data Sheet and the product label. Symptoms or effects that may arise if the product is mishandled and overexposure occurs are:

Acute Effects

Inhalation: Material may be an irritant to mucous membranes and respiratory tract.

Toxic in contact with skin. Can be absorbed through the skin with resultant toxic effects. Skin contact:

> Contact with skin will result in severe irritation. Corrosive to skin - may cause skin burns. A skin sensitiser. Repeated or prolonged skin contact may lead to allergic contact dermatitis.

Ingestion: Toxic if swallowed. Swallowing can result in nausea, vomiting, diarrhoea, abdominal pain

and chemical burns to the gastrointestinal tract.

Eye contact: A severe eye irritant. Corrosive to eyes: contact can cause corneal burns. Contamination of

eyes can result in permanent injury.

Acute toxicity

Inhalation: This material has been classified as non-hazardous. Acute toxicity estimate (based on

ingredients): LC50 > 20.0 mg/L for vapours or LC50 > 5.0 mg/L for dust and mist or LC50 >

20,000 ppm for gas

Skin contact: This material has been classified as a Category 3 Hazard. Acute toxicity estimate (based

on ingredients): 200 - 1,000 mg/Kg bw

This material has been classified as a Category 3 Hazard. Acute toxicity estimate (based Ingestion:

on ingredients): 50 - 300 mg/Kg bw

Corrosion/Irritancy: Eye: this material has been classified as a Category 1 Hazard (irreversible effects to eyes).

Skin: this material has been classified as a Category 1B Hazard (irreversible effects to skin).

Inhalation: this material has been classified as not a respiratory sensitiser. Sensitisation:

Skin: this material has been classified as a Category 1 Hazard (skin sensitiser).

Aspiration hazard: This material has been classified as non-hazardous.

Specific target organ toxicity (single exposure):

This material has been classified as non-hazardous.

Chronic Toxicit

This material has been classified as non-hazardous. Mutagenicity: This material has been classified as non-hazardous. Carcinogenicity:

Reproductive toxicity (including via

lactation):

This material has been classified as non-hazardous.

Specific target organ toxicity (repeat exposure): This material has been classified as non-hazardous.

ECOLOGICAL INFORMATION SECTION 12:

Avoid contaminating waterways.

Acute aquatic hazard: This material has been classified as non-hazardous. Acute toxicity estimate (based on

ingredients): >100 mg/L

Long-term aquatic

hazard:

This material has been classified as a Category Chronic 3 Hazard. Non-rapidly or rapidly degradable substance for which there are adequate chronic toxicity data available OR in the absence of chronic toxicity data, Acute toxicity estimate (based on ingredients): 10 - 100 mg/L, where the substance is not rapidly degradable and/or BCF ≥ 500 and/or log

ELASTOTEC DIRECT BOND CERAMIC FILLER PART B – RAPID CURE MATERIAL SAFETY DATA SHEET

 $K_{ow} \ge 4$.

Ecotoxicity: No information available. **Persistence and** No information available.

degradability: Bioaccumulative

potential:

No information available.

Mobility: No information available.

SECTION 13: DISPOSAL CONSIDERATIONS

Persons conducting disposal, recycling or reclamation activities should ensure that appropriate personal protection equipment is used, see "Section 8. Exposure Controls and Personal Protection" of this SDS.

If possible material and its container should be recycled. If material or container cannot be recycled, dispose in accordance with local, regional, national and international Regulations.

SECTION 14: TRANSPORT INFORMATION

ROAD AND RAIL TRANSPORT

Classified as Dangerous Goods by the criteria of the "Australian Code for the Transport of Dangerous Goods by Road & Rail" and the "New Zealand NZS5433: Transport of Dangerous Goods on Land".

UN No: 2922

Dangerous Goods Class: 8

Subsidiary Risk, Secondary Subsidiary: 6.1

Packing Group: II

Special Provisions: 274

Limited Quantities: 1 L

Proper Shipping Name: CORROSIVE LIQUID, TOXIC, N.O.S. (1,2-Ethanediamine, N,N'-

bis(2-aminoethyl)- and Cresylic acid)

Segregation Dangerous Goods: Not to be loaded with explosives (Class 1), dangerous when wet

substances (Class 4.3), oxidising agents (Class 5.1), organic peroxides (Class 5.2), radioactive substances (Class 7) or food and food packaging in any quantity. Note 1: Concentrated strong alkalis

are incompatible with concentrated strong acids. Note 2:

Concentrated strong acids are incompatible with concentrated strong alkalis. Note 3: Acids are incompatible with Dangerous Goods of

Class 6 which are cyanides. Exemptions may apply.

MARINE TRANSPORT

Classified as Dangerous Goods by the criteria of the International Maritime Dangerous Goods Code (IMDG Code) for transport by sea. This material is classified as a Marine Pollutant (P) according to the International Maritime

ELASTOTEC DIRECT BOND CERAMIC FILLER PART B – RAPID CURE MATERIAL SAFETY DATA SHEET

Dangerous Goods Code.

SECTION 15: REGULATORY INFORMATION

This material is not subject to the following international agreements:

Montreal Protocol (Ozone depleting substances)

The Stockholm Convention (Persistent Organic Pollutants)

The Rotterdam Convention (Prior Informed Consent)

International Convention for the Prevention of Pollution from Ships (MARPOL)

This material is subject to the following international agreements:

Basel Convention (Hazardous Waste)

□ Wastes from production, formulation and use of resins, latex, plasticizers, glues/adhesives

This material/constituent(s) is covered by the following requirements:

☐ The Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP) established under the Therapeutic Goods Act (Commonwealth).

□ All components of this product are listed on or exempt from the Australian Inventory of Chemical Substances (AICS).

SECTION 16: OTHER INFORMATION

Reason for issue: Revised

This information was prepared in good faith from the best information available at the time of issue. It is based on the present level of research and to this extent we believe it is accurate. However, no guarantee of accuracy is made or implied and since conditions of use are beyond our control, all information relevant to usage is offered without warranty. The manufacturer will not be held responsible for any unauthorised use of this information or for any modified or altered versions.

If you are an employer it is your duty to tell your employees, and any others that may be affected, of any hazards described in this sheet and of any precautions that should be taken.

Safety Data Sheets are updated frequently. Please ensure you have a current copy.
